

HL 400 - HL 800

## **HEAT WITH SIDE EFFECTS - FINE DUST FROM WOOD FIRES**

AVOID DANGEROUS FINE DUST POLLUTION INDOORS WITH  
MOBILE AIR PURIFIERS

# HEAT WITH SIDE EFFECTS - FINE DUST FROM WOOD FIRES

## AVOID DANGEROUS FINE DUST POLLUTION

### INDOORS WITH MOBILE AIR PURIFIERS

As a result of the gas crisis, more and more people are using stoves and fireplaces. The fine dust from wood fires pollutes and contaminates the air indoors. Not only is this unpleasant, it is also harmful to health.

#### THE SOLUTION:

**With the mobile air purifiers HL 400 and HL 800 from Heylo, dangerous fine dust pollution indoors can be avoided**

Air purifiers as the HL 400 and HL 800 reduce the concentration of pollutants such as fine dust and odour molecules present in the ambient air. Contaminated air is drawn in with the help of a fan and passes through various filters. Coarse particles up to 3 µm are separated via the pre-filter. A HEPA filter with a separation efficiency of 99.995 % is used as the main filter. In addition, carbon filters are used for the neutralisation of odours.

HL 400

HL 800

Selectable main filter: EPA E11 or HEPA H14  
Multi-stage air purification: Pre-filter, main filter, activated carbon filter, ionisation and sterilising UV light  
Automatic air quality indicator  
Multi-stage fan  
WIFI control via APP  
UV-A light against bacteria (365 nm)  
Removable cover for easy filter change  
Child lock  
Fragrance function

Selectable main filter: EPA E11, HEPA H14, H14 PTFE  
4-stage air purification: Pre-filter, main filter, activated carbon filter, ionisation  
Automatic air quality display  
WIFI control via APP  
Multi-stage fan  
Automatic and night mode  
Removable covers for easy filter change  
Child lock
