DANTHERMGROUP

EFFECTIVE AIR CLEANER HL 400 PLUS

HL 400 PLUS: filters bacteria, pollutants odours, COVID-19 (incl. DELTA and OMICRON variant) and other viruses

Easy operation – monitoring and controlling via App

APPLICATION

- Filters bacteria, viruses, pollen, dust and odours so that viruses, such as COVID-19, are filtered out of the room air and contained so that they can no longer escape
- It is suitable for a room size of 50 m² at three air exchanges per hour (E11 filter)
- The HL 400 PLUS with HEPA H14 filter strongly reduces the concentration of viruses and germs
- Ideally suited for flats, homes and offices, shops, medical practices, seminar and training rooms
- The HL 400 PLUS air cleaner effectively improves the indoor air quality in various spaces where people are present

FEATURES

- Effectively reduces indoor pollutants and improves the air quality, filters bacteria, viruses, pollen, dust and odours effectively
- Main filter optional: EPA E11 or HEPA H14
- HEPA H14 filter against bacteria and viruses (also against COVID-19 and all other variants), EPA E11 filter against dust and Activated Carbon filter against unpleasant smells
- Multi-stage cleaning: Pre-filter, main filter, activated carbon filter, sterilizing UV light, ionization
- Automatic air quality control
- Aroma function
- Multi-stage fan
- Controllable via Wi-Fi and via App
- UV-A light against bacteria (365 nm)
- Removable cover for easy filter change
- Child safety lock
- Compact size and low weight

Air cleaner HL 400 PLUS

+
